Evaluating & Treating Juveniles who Commit Sexual Offenses

Presented by Michael Sullivan, MSW, and Dr. Alice Hougardy, PsyD (10/05/18)

9:30 – 11:00

- Overview of the evaluation process
- Risk Assessments: their strengths and their weaknesses
- Relevant Standards of Care, per MSOTA and ATSA standards
- Research on recidivism rates and how to best conceptualize risk

11:00 – 12:30

- Current research on treatment effectiveness and best-practice: What works? What does not work?
- Treatment Design at Pine Hills (only State residential program): therapeutic milieu, program design, special conditions for boys in the sex-offense specific program)
- Recidivism following treatment with studies that show reduction in negative behaviors following the completion of treatment

Training Objectives:

- Have a working knowledge of juvenile evaluations
- Understand the different risk assessments an evaluator may use and their strengths and weaknesses
- Understand recidivism rates within the population and how to conceptualize risk
- Have a working knowledge of treatment practices and best approaches for treating youth and services/care available in our state
- Be able frame risk following treatment completion
